			style guide		
			second user testing		
			WebApp structure		
			presentation		

To Do

0/24 completed

Huset-KBH

Collaboration agreement	SEO Exercise	Trello action plan	Wordpress website	Web app	Final presentation

SEO Exercise
- Personas
- Customer journey
- Implementation

Trello action plan
- Sort tasks
- Schedule meetings

Wordpress website
- Restructure Huset's IA
- Add content relevant to all personas
- Sort content by category
- Design pattern for navigation

Web app
- Add content to JSON
- Create style tile
- Code website
- Wireframes
- Testing

Final presentation
- Create presentation

This illustration shows how we will focus on structuring our tasks. We started by looking at the hand-ins that we have for the upcoming weeks as a start. The pattern of the diagram for the hand-ins is linear, because they all have due-dates after each other and we will do them in the order they are displayed. Underneath each hand-in we have a sort of checklist of tasks that need to be completed before the hand-in is complete and ready for delivery. Underneath "SEO exercise", "Wordpress website" and "final presentation" you also have a linear pattern, because the tasks need to be completed in order, so that we can move on to the next task. "Trello action plan" and "Web app" and the diagram as itself as a whole is a combination of a hierarchy and linear pattern.
